1.1

At the launch of wBox app, it will ask you to log in or create an account.
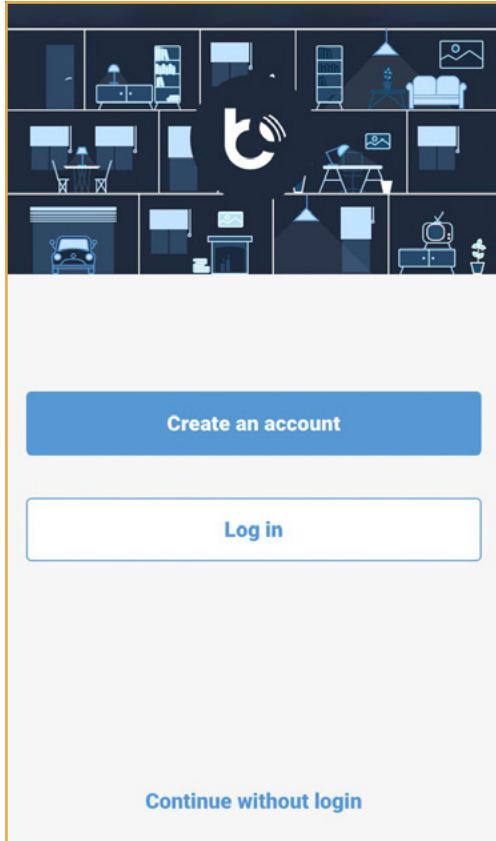

You can create the **BleBox** account or log in using your **Google, Apple** or **Facebook** account.

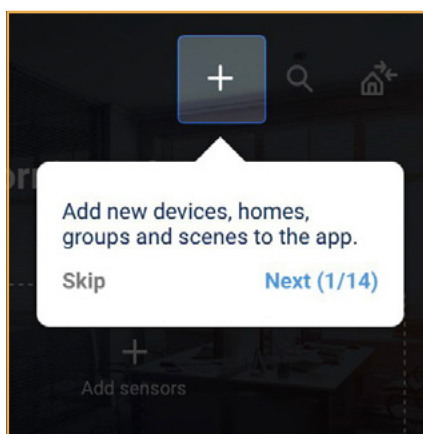

You can continue without login (dedicated for installers for one-time connection of the controller), but the features of the app will be limited.

We strongly recommend to create an account or log in.

1.2

After logging in, the **wBox** tutorial will automatically appear.

If you don't see the tutorial, click on the „**Menu**", ☰
and then on „**How to use**".

2.1 Connect the phone with the BleBox controller.

iOS version

iOS

∨

Please turn off mobile network/ cellular data in your phone.

Android version

∨

∨

Please select WiFi settings in your phone and turn on WiFi network.

∨
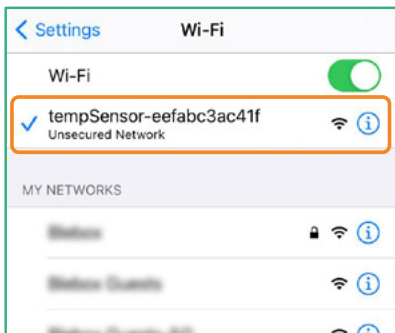

Connect to the WiFi network provided by the controller, for example: - *„device-xxxxxxxxxx"*, where xxxxxxxxxx is the unique number of the device.
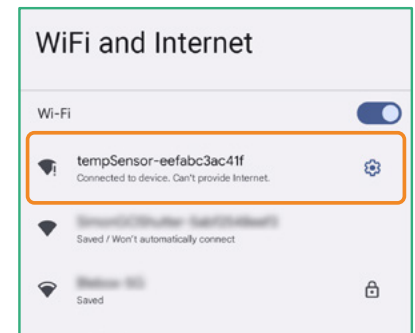

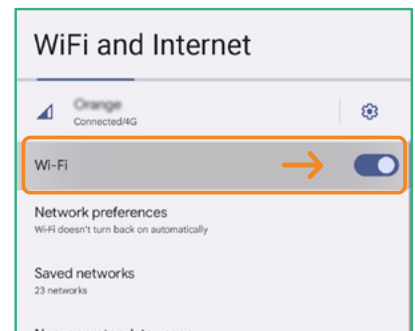

! **Connected!**

Some phones may report that **"Internet may not be available"** - it's normal, please continue with this WiFi network.

After connecting to the WiFi network of the BleBox controller, return to the wBox application .

Version A

Please use **„+ Add device to account"** button to add the device to your account. **Now you became the owner of the device.**

①

Good morning, BleBox!
⌂ K71

＋
Add sensors

Direct connection was established to the WiFi network emitted by the device

🌡 My tempSensor

＋ Add device to account

Use only once

**Ready!**

You have added the device to your account. Then **„Go to WiFi settings".**

* If the message did not appear or you clicked „Cancel", please refer to version B (page 5).
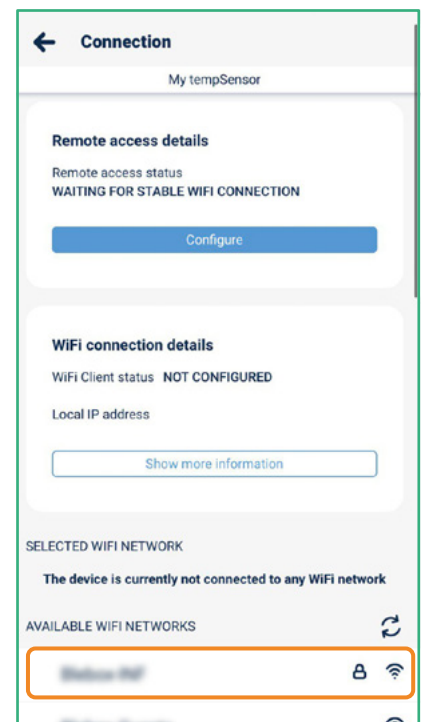

②

Remember!

The owner of the device has the right to grant and revoke access to the device to other users.

Good morning, BleBox! 🔍 ⌂

✓ **Success**
The device has been associated with the application.

＋
Add sensors

The device has been associated with the application, but it is not configured with your wifi network.

Connect

Enter your home WiFi password, then click **"Connect"**.
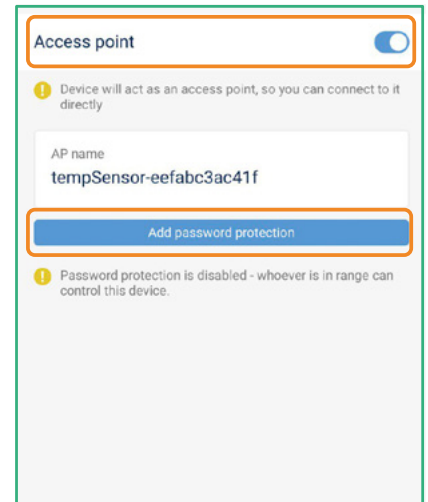

5

2.3 Disable or set a password for the service connection.

Click the settings icon ⚙.

Go to the „**Service Connection (AP)**" section.

Here you can **disable the access point** or set a password for the AP **to prevent unauthorized access**.
That's all!

For more information about your specific device, see the user guides.

Please continue below if you want to see how to share a configured device with another family member.
3.1   Add configured controller using another smartphone.

Find the „**+**" icon at the top of the screen.
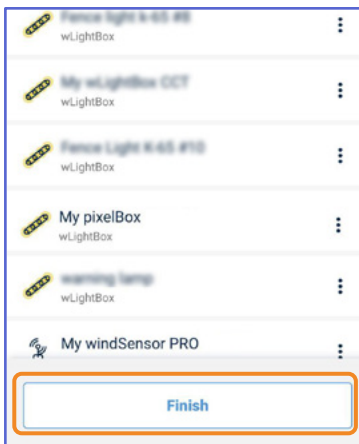

1

Click „**Add New Device**".

2

Select „**Add devices already connected to the WiFi network**".
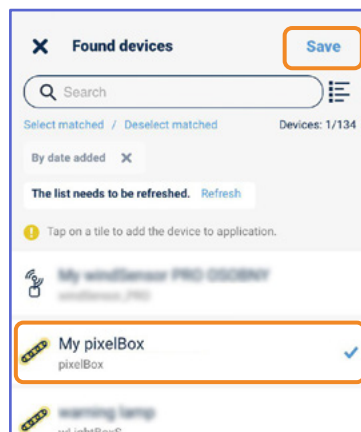

3

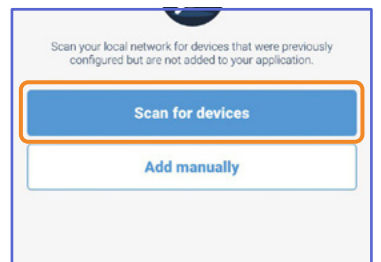

Click „**Finish**", the drivers will be added.

6

Select the devices you want to add to your account and press „**Save**".

5

Select „**Scan for devices**" for devices and wait for the scan to complete.

Remember that you must be connected to the same WiFi network as the BleBox controller.
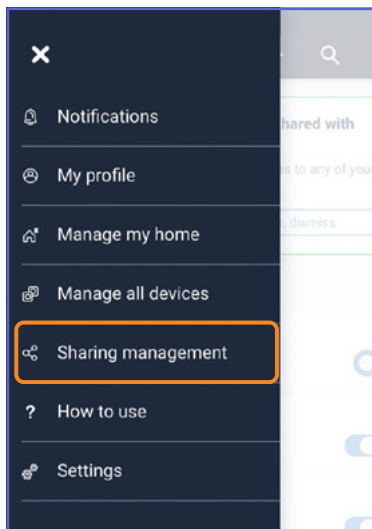

4

That's all!

You can go back to the dashboard or add controllers to specific home.

3.2 Sharing controllers via e-mail.

Use **"Sharing management"** option in wBox app menu ≡.

Use share option in μPortal **https://portal.blebox.eu.**
